Association of Indian Physics Students (AIPS)

Dear Participants,

We have finished checking and evaluating all the answer copies of IYPL 2022.

It was amazing to see 24 teams joining us for over 3 hours of head-scratching — on a Saturday afternoon, all in the spirit of pushing their boundaries.

We applaud your dedication.

With that said, we are glad to announce the top three teams who came out victorious on the top of the nail-biting contest.

The top 3 teams of the second edition of the Indian Young Physicists League are:

#1: Team Curie-Osity

Acchyt Jolly, Bhuvan S V, Yashee Sinha
from BITS Goa

#2: Team Canopus

Nishant Gaurav, Sirswa Kuldeep Shree Ram, Surjakanta Kundu
from IISER Kolkata

#3: The Ferminions

Biplab Sarkar, Pranjal Barik, Subhra Khan
from Savitribai Phule Pune University

As mentioned before, the winning team "**Curie-Osity**" will represent India in PLANCKS 2022.

The jury and we were amazed by how well you approached the unorthodox problems in the limited time.

For all the top three teams, we have special prizes planned for you from the Association of Indian Physics Students (you'll receive a mail for that soon).

All the teams will receive certificates for participation within next month.

That was all for IYPL 2022. Congratulations to all teams for participating. We hope to see you at IYPL again next year. Stay tuned for upcoming events!

Meanwhile, we will be absolutely delighted if you find our activities worth contributing to and consider joining us as members. We are a group of 100+ fellow physics students and researchers from 16 cities spanning 7 states.

Members get access to exclusive events and initiatives, grants for organizing their activities, meet like-minded physics students through our national and the international IAPS network, and access to events including the flagship conference ICPS, iaps2cern, amongst many others.

To become a member, fill this form: <https://forms.gle/tJdeh956opbtss2U8>

Thank you and congratulations to the participants and OC for putting India on the PLANCKS map yet again, and organizing an unprecedented theoretical physics competition in India by physics students, for physics students.

Warm Regards,

Yash Gurbani (President NC-India)
